Portfolio shivesh-kumar-kanoujia.github.io/Portfolio

CAREER OBJECTIVE

B.Tech Computer Science Engineering (AI & ML) student with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, and Full Stack Development. Passionate about building AI-powered applications and seeking a Software Engineering / AI Internship to apply technical and problem-solving skills to real-world challenges.

EDUCATION

Chandigarh University, Uttar Pradesh

CGPA: 8.20 (First Year)

Expected Graduation: 2029

B.Tech Computer Science Engineering (AI & ML)

Escorts World School

95.8%

Class XII – CBSE

Escorts World School

91.6%

Class X – CBSE

TECHNICAL SKILLS

Languages: Python, C, C++, JavaScript, SQL

Tools: Git, GitHub, VS Code, Railway, Vercel

Frontend: HTML, CSS, React, Next.js, Tailwind CSS

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Computer Networks, Problem Solving

Backend: Flask, FastAPI, REST APIs

Database: PostgreSQL, Supabase

PROJECTS

Atlas – AI Powered Smart Travel Guide

Next.js | FastAPI | Supabase

- Built a full-stack travel platform integrating an AI chatbot, trip planner, weather lookup, and currency converter into a single unified interface
- Developed a FastAPI backend with Supabase for data persistence and an AI-based image analysis feature for travel-related queries
- Designed a responsive, mobile-friendly UI using Next.js to deliver a smooth, personalized travel planning experience

Personal Expense Tracker

Flask | Pandas | NumPy | Matplotlib

- Developed a full-stack expense tracking web application with Flask, including user authentication and secure session management
- Built expense analytics pipelines using Pandas and NumPy to categorize and summarize spending patterns
- Generated visual spending reports with Matplotlib and designed a responsive dashboard for real-time expense tracking

Perception Analyzer

Python | Azure AI

- Built an AI-driven review analysis system that evaluates product ratings using Azure AI services
- Implemented sentiment analysis and key phrase extraction to identify customer opinions from product reviews
- Generated automated review summaries to help highlight overall customer perception at a glance

CERTIFICATIONS

- HackerRank – SQL (Basic)
- IBM SkillsBuild – Design Thinking Practitioner
- IBM – Data Analysis and Visualization with Python
- HP LIFE – Critical Thinking in the AI Era
- Microsoft Azure Fundamentals (AZ-900)
- Professional Networking for Career Growth
- Microsoft Azure AI Fundamentals (AI-900)
